**YOUR ADVANTAGES**

- Maximum permissible weight up to 44 tons possible (28-29 t load capacity)
- Shifting truck transport to rail – reduction of CO₂ emission per ton and kilometer: 54 g CO₂ are saved
- In combined transport this equates to a reduction of 2/3 of CO₂ emissions*

* According to the transport emission model (TREMOD) by the IFEU-Institute in Heidelberg

**FIXEMER**

Fixemer is specialized in FTL consignments. Thanks to the extensive network of clients and partners, the company is one of the most effective transport service providers in Europe. Since 1951 the Fixemer Group has been continuously expanding its international haulage networks and is one of the pioneers in the development of transport links in Eastern Europe. Using a large number of our own trailers, we exploit the advantages of intermodal transportation by sea, rail and road - thus saving resources and protecting the environment.

The effectiveness of our Total Quality Management system has been confirmed by ISO certification and the safety and quality assessment system of the European Chemical Industry Council.

- Quality management in accordance with DIN EN ISO 9001
- Environmental management in accordance with DIN EN ISO 14001
- SQAS Safety and Quality Assessment System

---

---

**TRANSPORT PROCESS**

Daily connections via the three corridors Gotthard / Lötschberg / Brenner between the Italian terminals Busto / Novara / Verona on the one side, and numerous terminals in Germany / Benelux on the other side.

From these terminals also exist connections from and to France, Spain and Eastern Europe.

Furthermore, Fixemer maintains direct connections as well as daily gateway connections between Sweden and Italy several times a week.
